SOLOMON TOMY

JAVA FULL STACK DEVELOPER | ERP & MARKETPLACE INTEGRATIONS

Dubai, UAE | +971 52 654 8011 | solomontomy2446@gmail.com
linkedin.com/in/solomon-tomy-a4a024210 | solomontomy-portfolio.netlify.app

PROFESSIONAL SUMMARY

Java Full Stack Developer with 4+ years of experience delivering ERP systems, marketplace integrations, and business automation. Owns requirements, architecture, implementation, AWS deployment, and production support for UAE trading businesses. Core expertise in Java, Spring Boot, PostgreSQL, and Amazon/Noon integrations. Leads and mentors one junior developer. Earlier manufacturing ERP work reduced manual costing effort by 40% and improved report-generation performance by 25%.

TECHNICAL SKILLS

Backend: Java, Spring Boot, Spring MVC, REST APIs, Node.js (basic)

Frontend: JavaScript, HTML5, CSS3, JSP, Chart.js; React (personal portfolio)

Database: PostgreSQL, SQL optimization, transactional controls, data integrity

ERP & Business Processes: Adempiere ERP, manufacturing, finance, inventory, BOM, production estimation, raw-material costing, order processing, pricing calculations

Marketplace Integration: Amazon APIs, Noon FBPI, pricing and inventory synchronization, order-status updates, batch processing

Cloud & Reliability: AWS EC2, IAM, VPC, authentication, access controls, rate-limit handling, retry logic, logging, monitoring, error handling

Product & Technical Leadership: Product ownership, requirements analysis, roadmap planning, feature prioritization, solution architecture, junior developer mentoring, code review, release ownership

Reporting & Delivery: JasperReports, dashboards, Git, unit testing, production debugging, Agile delivery, stakeholder collaboration

PROFESSIONAL EXPERIENCE

ERP Technical Product Owner & Full Stack Development Lead

Paramount Global General Trading LLC | Dubai, UAE
May 2026 - Present

- Own the custom ERP product lifecycle from stakeholder discovery and roadmap planning through architecture, full-stack development, deployment, production support, and continuous improvement.
- Architected and independently developed the ERP platform for end-to-end trading workflows, translating operational requirements into production features that reduced reliance on manual processes.
- Integrated Amazon and Noon marketplace APIs with ERP pricing, inventory, and order workflows, supporting pricing and inventory synchronization and consistent order-status updates across systems.
- Strengthened backend transaction processing through authentication, rate-limit handling, retries, batch processing, and transactional controls to support reliable operations and data integrity.
- Lead and mentor one junior developer by assigning implementation work, providing technical direction, reviewing code, and maintaining delivery quality across ERP enhancements.
- Configured and secured AWS EC2, IAM, and VPC infrastructure for ERP deployment, incorporating logging and monitoring to support production operations and troubleshooting.

PROFESSIONAL EXPERIENCE - CONTINUED

ERP Technical Product Owner & Full Stack Developer

We Never Close LLC | Dubai, UAE
November 2025 - May 2026

- Served as the sole IT professional and technical product owner, independently managing ERP requirements, architecture, development, deployment, maintenance, and production support.
- Architected and deployed a custom ERP solution connecting marketplace operations, pricing calculations, bulk synchronization, and order workflows within a single operational platform.
- Integrated Amazon and Noon APIs with secure access controls, resilient error handling, and production monitoring, supporting dependable communication between the ERP and external marketplaces.
- Managed AWS deployment and security configuration for the ERP platform, maintaining data integrity across internal workflows and external-platform transactions.

Software Developer / Software Engineer

Teksalah | Kochi, India
May 2023 - May 2025

- Engineered Java processes and PostgreSQL-backed customizations for Adempiere manufacturing, finance, and inventory modules, supporting BOM management, production estimates, and costing requirements.
- Automated raw-material cost estimation within ERP workflows, reducing manual calculation effort by 40% and streamlining costing activities.
- Optimized SQL queries supporting ERP reporting, improving report-generation performance by 25% and accelerating access to operational information.
- Integrated JasperReports, Spring Boot email alerts, REST APIs, and responsive web modules with Chart.js dashboards, extending ERP reporting, notifications, and operational visibility.
- Led ERP and web customization for a Dubai-based manufacturing client, aligning software changes with business workflows and supporting deployment and production issue resolution.

Associate Software Engineer

PIT Solutions | Thiruvananthapuram, India
May 2022 - April 2023

- Developed and maintained Java and Spring MVC functionality alongside HTML, CSS, JavaScript, and JSP modules, integrating backend APIs with frontend systems to deliver application enhancements.
- Delivered three key features with zero critical bugs, contributing unit testing and defect resolution throughout Agile development and client-review cycles.
- Optimized SQL queries for existing application workflows, improving application speed by 15% and supporting enhancements for European clients.

EDUCATION

Bachelor of Computer Applications (BCA) - Computer Programming
Augusthinose College, Mahatma Gandhi University | 2019 - March 2022

CERTIFICATION

Oracle Certified Associate, Java SE 8 Programmer I
